

Devrath AD

Senior Software Engineer · Android

I build reliable, thoughtfully-architected Android apps with Kotlin and Jetpack Compose.

"One of the most driven and collaborative professionals I've met."
— Richard Chao · Project Manager

01 ABOUT

I'm a software engineer passionate about writing software that solves problems in a creative way. For over a decade I've lived and breathed the Android platform — from the days of AsyncTask and XML layouts to modern, multi-module apps built with **Kotlin**, **Coroutines & Flow** and **Jetpack Compose**.

Currently I'm a senior engineer at **The Economist**, where I build the Android experience that brings independent journalism to millions of readers — live & on-demand streaming, podcasts, and an offline-first reading experience. Over the years I've shipped apps used by millions across e-sports, automotive CRM, travel, healthcare, ed-tech and retail.

Outside of work I'm a dedicated open-sourcer and writer: I maintain **70+ public repositories** of Android samples and reference architectures, write about Android internals **on Medium**, and have been answering questions on Stack Overflow since 2011.

14+ years of building Android software — from an internship at Intel in 2011 to shipping journalism at The Economist today, across product companies, consultancies and studios.

14+ years

9 companies

11 roles

Android · Kotlin

APR 2024 — PRESENT

**Senior Software Engineer · The Economist** ↗

Building the Android app of one of the world's most respected publications. Architected live & VOD audio/video streaming with Picture-in-Picture, podcast playback with offline downloads and pick-up-where-you-left-off, an offline-first reading experience, AdMob integration, and an MVI multi-module architecture with a reusable Compose design system.

Kotlin

Jetpack Compose

Media3 / ExoPlayer

MVI

JAN 2024 — MAR 2024

**Senior Software Engineer · EPAM Systems** ↗

Implemented MVI architecture with Jetpack Compose, led hiring and onboarding for the team, and mentored junior engineers to support their career development.

Kotlin

Jetpack Compose

MVI

Mentoring

OCT 2023 — DEC 2023

**Software Engineering Consultant · Kratos Gaming Network** ↗

Led the go-to-market strategy for Jetpack Compose adoption and designed the integration of a game into a legacy codebase with modern Android components — coordinating sprint planning and technical feasibility with project management.

Kotlin

Jetpack Compose

Gaming

JAN 2022 — SEP 2023

**Software Engineer III · Mobile Premier League (MPL)** ↗

Built for one of the world's largest eSports mobile platforms, serving ~85 million users: developed the broadcast-streaming module for live tournaments, bridged Android native with React Native and Unity, built a parallel high-speed downloader with WorkManager, and spearheaded Kotlin and DI adoption.

 **Game-asset download failures: 7–19% → <0.5%**

Kotlin

Streaming

Unity / React Native interop

Scale

AUG 2020 — JAN 2022

Lead Software Engineer · Recro ↗

Led a large-scale refactor from MVC to MVVM with modularity and automated testing at the core, and delivered **DealerSocket CRM** — a major mobile release for the US automotive client — working directly with client engineers, product owners and designers.

Kotlin

MVVM

Team Leadership

FEB 2020 — AUG 2020

Principal Product Engineer II · Cybernetyx ↗

Spearheaded Android development for the **Kneura** blended-learning platform — an intelligent assistant that customises learning curriculums — plus a silent-update system across product variants and canvas tools for interactive classroom hardware.

Kotlin

Ed-tech

Hardware Integration

OCT 2014 — JAN 2020

SpurTree Technologies · 3 roles over 5+ years ↗

NOV 2019 — JAN 2020

Senior Solutions Engineer

Guided the technical roadmap with MVVM/MVC architectures, built reusable building blocks, and led recruitment for the mobile teams — including work on **Disney Cruise Line Navigator**.

OCT 2016 — NOV 2019

Senior Technical Associate

Led technical delivery for clients including **Shoppers Stop**, Doctor 24x7, Disney and Samsung (the KALIMA lock-screen Arabic-learning app) — RxJava multithreading, Dagger 2 DI, location services and offline storage.

OCT 2014 — SEP 2016

Technical Associate

Full-lifecycle Android development — Activities to Services to Broadcast Receivers — with secure frontend-backend integration for consumer apps.

Java

Kotlin

RxJava

Dagger 2

MAY 2013 — SEP 2014

Freelance Developer · TwinVaves Technologies Pvt Ltd

Led development of the "GodiswithMe" app end-to-end — research, story-path design, development, testing, Play Store deployment and maintenance — reaching 8,000+ downloads worldwide.

Android

Java

End-to-end delivery

NOV 2011 — AUG 2012

Intern · Intel Corporation ↗

Where it all began — helped build a recommendation engine through requirements, design, implementation and testing, and supported the IndiaEduServices pilot across colleges.

🎓 EDUCATION

Ramaiah Institute Of Technology

Master's Degree, Computer Software Engineering · 2010 — 2012

Dissertation: "Optical Character Recognition For Auto Navigation Of Robot".

Malnad College of Engineering

Bachelor's Degree, Information Science · 2006 — 2010

Dissertation: "Multi-model Video Surveillance using pyro-electric infrared sensors".

📜 LICENSES & CERTIFICATIONS

Google Associate Android Developer Certification

Issued Feb 2022

💖 VOLUNTEERING

Community Moderator · Stack Overflow

Jan 2011 — Present

Active community member with 42k+ reputation, 55 gold badges, a top-150 ranking in India — and the 390th person in the world to earn the Android gold badge.

Member, Board of Studies · Malnad College of Engineering

Jun 2024 — Present

Advising on the scheme and syllabus for the Information Science & Engineering department — keeping the curriculum aligned with the tools and technologies students need in industry.

Guest Speaker · NAVKIS College of Engineering

Apr 2021

Trained faculty from multiple colleges in a VTU-authorised faculty development program on Android and Kotlin mobility platforms.

Campus Recruitment Drives · SpurTree Technologies

May 2019

Conducted placement drives for fresh graduates at Malnad College of Engineering, Hassan and Vidyavardhaka College of Engineering, Mysore.

🏆 HONORS & AWARDS

Video Content of the Year

Professional Publishers Association · Jun 2026 · The Economist

Played a key role in developing Insider, The Economist's video streaming platform — our team received the PPA's Video Content of the Year award.

Code Star

Mobile Premier League · Nov 2021

Led the Android Download Manager integration that cut game-asset download failure rates from 7–19% to below 0.5%, improving retention and user experience.

Mobile Application Development — Hands-On Experience

NAVKIS College of Engineering, Hassan · Apr 2021

Recognised for teaching college faculty in a Visvesvaraya Technological University—authorised faculty development program on mobile development.
